

Clock your **Team**, Anywhere, Anytime.

Smart, Mobile, Geolocation and Real-Time Clocking Solution for People on the Move

Single Android device to clock the entire team.

Optional External USB fingerprint reader, for biometric clockings.

Allow for manual clockings to be captured from the device (Only specific team leaders).

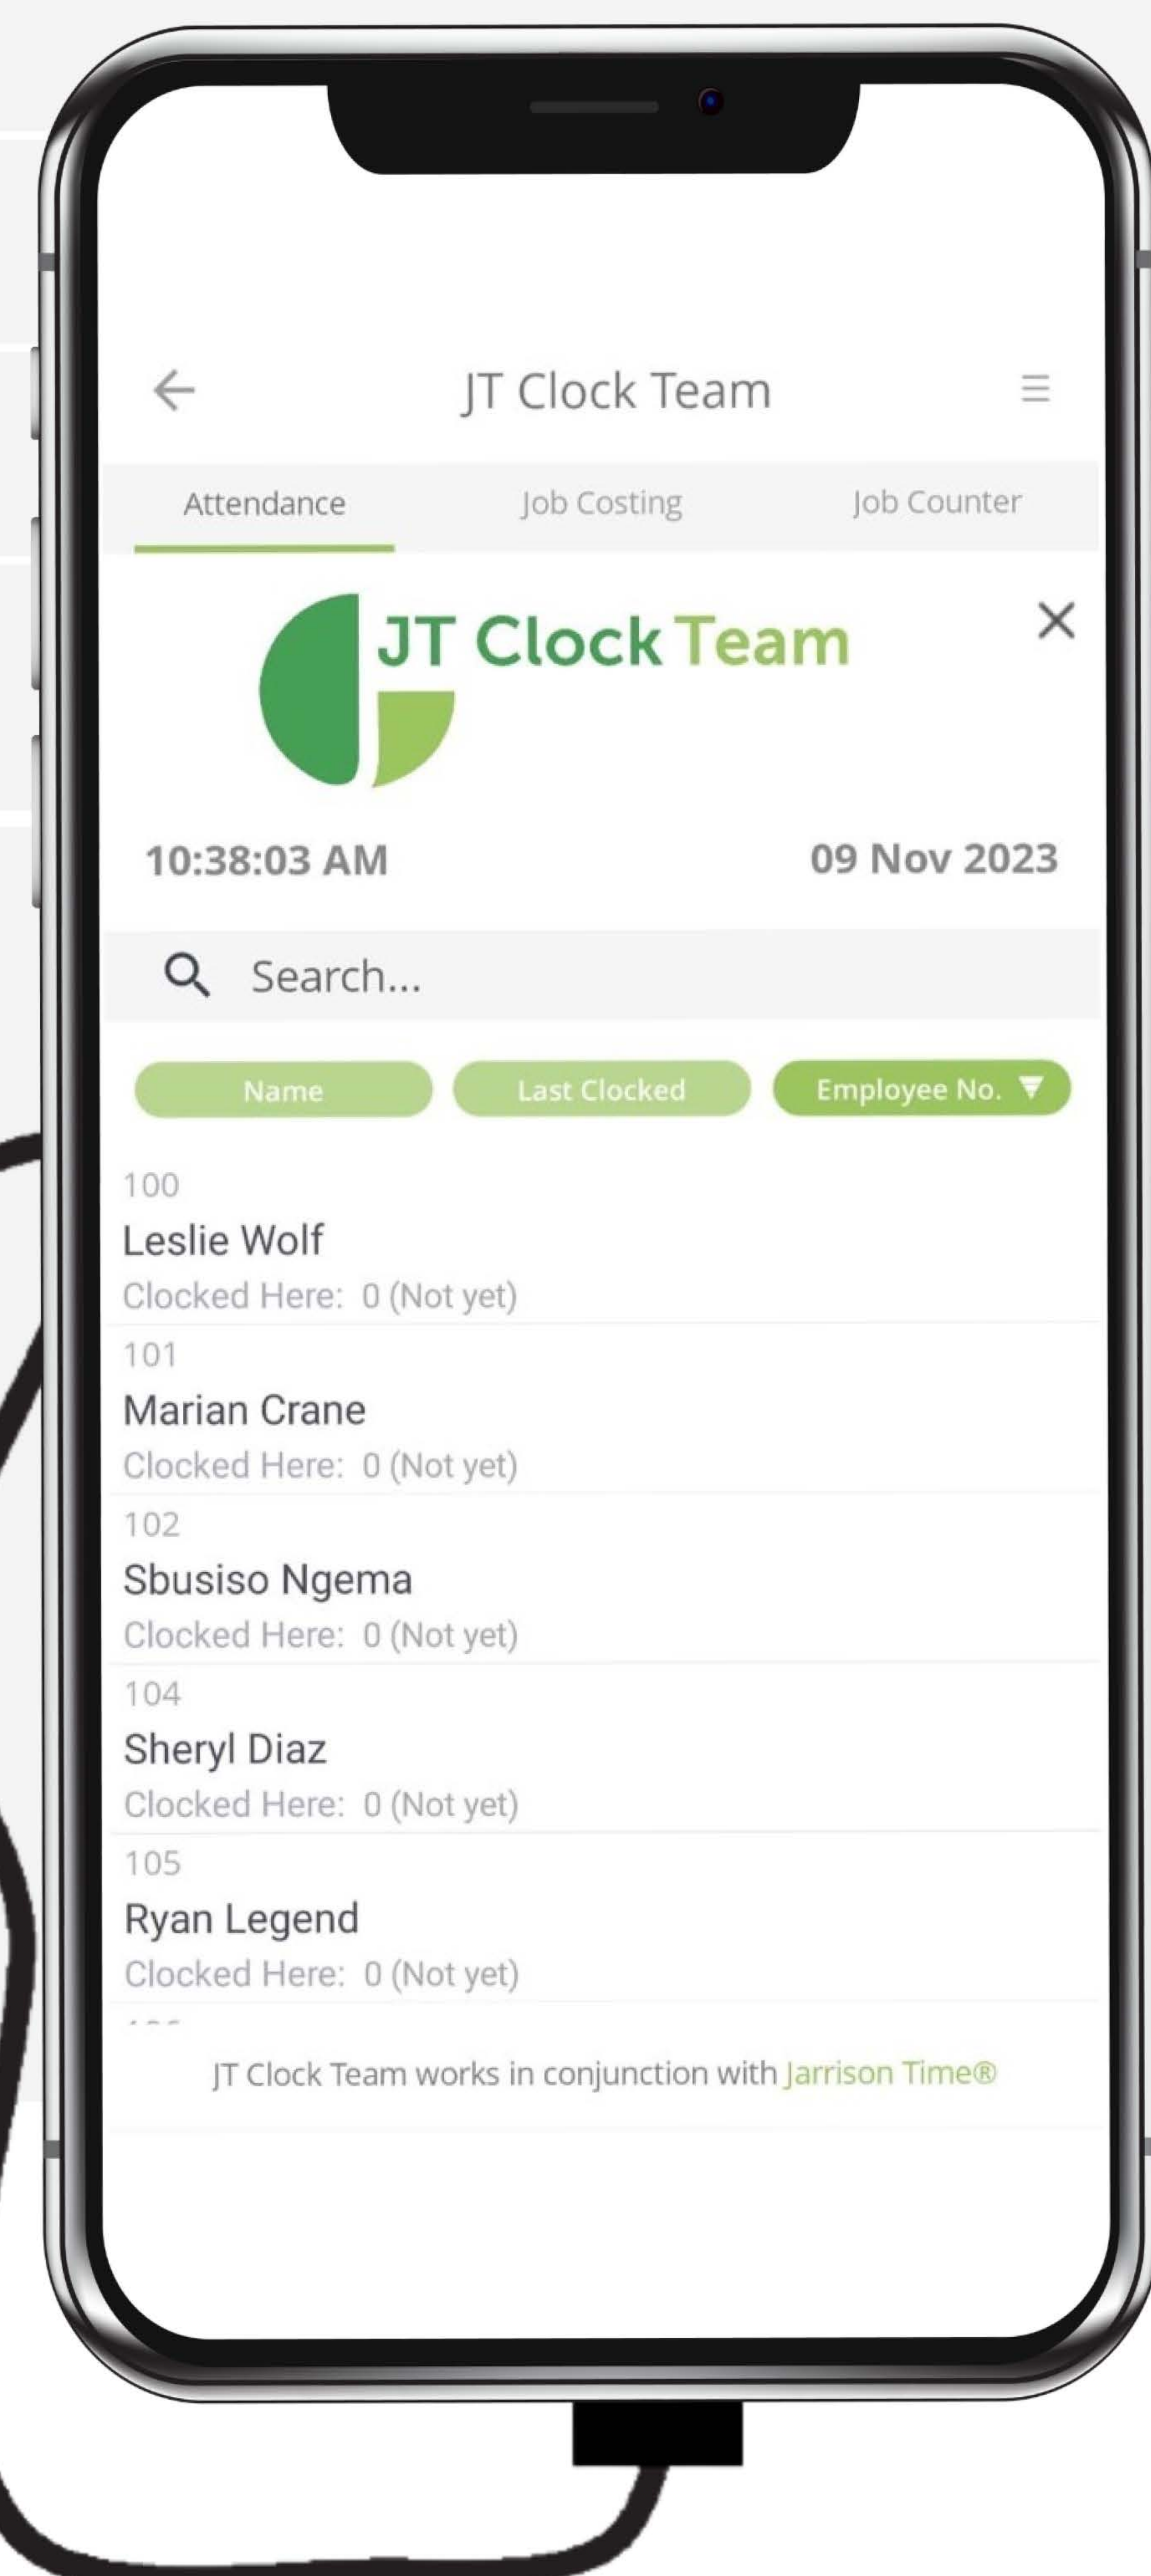

Enroll people's biometric templates on the device or send existing compatible templates to the device from Jarrison Time.

Caters for Job Costing transactions, with customized Job sets per device. (Job Costing module required)

Can use device's location service (GPS or Network) for all clockings.

Offline capabilities (Send & Receive info once online).

Settings managed in Jarrison Time (Not on device).

JT Clock works with Jarrison Time and it's associated modules.
Please contact your supplier for Jarrison Time.
External Fingerprint Reader and Mobile Device separate from application.
